Experiment 9: Simple Chatbot Using If–Else Logic

```
from datetime import datetime

def chatbot_response(user_input):
    text = user_input.lower().strip()
    words = text.split()

    if text == "bye":
        return "Goodbye! Have a nice day!"

    elif text in ["hi", "hello", "hey"]:
        return "Hello! How can I help you?"

    elif "name" in words:
        return "I am a simple chatbot."

    elif text in ["how are you", "how are you?"]:
        return "I'm doing great, thanks for asking!"

    elif "help" in words:
        return "I can answer greetings and simple questions."

    elif "weather" in words:
        return "I can't check live weather, but I hope it's sunny!"

    elif "time" in words:
        return "Current time: " + datetime.now().strftime("%H:%M:%S")

    elif "thank" in text:
        return "You're welcome!"

    else:
        return "Sorry, I didn't understand that."

print("Chatbot started. Type 'bye' to exit.")

while True:
    user_input = input("You: ")
    response = chatbot_response(user_input)
    print("Chatbot:", response)

    if user_input.lower().strip() == "bye":
        break
```

```
Chatbot started. Type 'bye' to exit.
You: Hi
Chatbot: Hello! How can I help you?
```

```
You: Name
Chatbot: I am a simple chatbot.
You: How are you!
Chatbot: Sorry, I didn't understand that.
You: Bye da
Chatbot: Sorry, I didn't understand that.
You: Bye
Chatbot: Goodbye! Have a nice day!
```
